Department of Marine Sciences

University of Puerto Rico, Mayagüez, Puerto Rico 00708

INTRODUCTION

A RESEARCH cruise on the R/V Crawford to the South Coast of the Dominican Republic was conducted 14-22 May 1979 by the Department of Marine Sciences in cooperation with Centro de Investigaciones de Biología Marina de la Universidad Autónoma de Santo Domingo. Almost 500 species of plants and animals were collected or observed during more than 100 man-hours underwater.

MATERIALS AND METHODS

One hundred sixty-eight scuba dives were made by 14 members of the Department of Marine Sciences and four members of Centro de Investigaciones de Biología Marina. Three

study areas were selected (Fig. 1): (1) La Caleta, 18°26.2'N, 69°41.3'W, (2) Isla Saona, 18°06'N, 68°40W (3) Isla Catalina, 18°21.4'W, 69°01'W.

Scientific names and author(s) are listed for each species in the checklist. Common names are noted whenever possible. The compiler(s) responsible for each segment of the checklist is(are) noted in the beginning of the segment. Segments are separated by horizontal lines. The three letter code in the righthand margin corresponds to the three study areas (Fig. 1). The letters indicate: (C) specimen collected, (O) specimen observed and identified in the field.

Luis H. Mendoza served as Captain, Ernest H. Williams as chief Scientist, Walter F. Hendrick as safety officer for this cruise.

LIST OF ORGANISMS

VIRUSES — Lucy Bunkley Williams

Lymphocystis Disease Virus in <i>Eupomacentrus partitus</i>	— C —
---	-------

PLANTS — David L. Ballantine

Phylum Chlorophyta	
Order Cladophoraceae	
Family Cladophoraceae	
<i>Cladophora</i> sp.	C — —
Order Siphonocladiales	
Family Dasycladaceae	
<i>Neomeris annulata</i> Dickie	— — C
Family Valoniaceae	
<i>Anadyomene stellata</i> (Wulff) C. Agardh	— — C
<i>Valonia ventricosa</i> J. Agardh	— C —
<i>Microdictyon boergesenii</i> Setchell	— — C
Order Siphonales	
Family Caulerpaceae	
<i>Caulerpa cupressoides</i> (West) C. Agardh	— C C
<i>Caulerpa mexicana</i> (Sonder) J. Agardh	— C C
<i>Caulerpa microphysa</i> (Weber-van Bosse) J. Feldmann	— — C
<i>Caulerpa prolifera</i> (Forsskål) Lamouroux	— — C
<i>Caulerpa racemosa</i> (Forsskål) J. Agardh	— C —
<i>Caulerpa serrulata</i> (Forsskål) J. Agardh	— — C
<i>Caulerpa sertularioides</i> Howe	— — C
Family Codiaceae	
<i>Avrainvillea nigricans</i> Decaisne	— — C
<i>Codium isthmocladum</i> Vickers	— C —
<i>Halimeda copiosa</i> Goreau and Graham	C — C
<i>Halimeda discoidea</i> Decaisne	— — C
<i>Halimeda favulosa</i> Howe	— C —
<i>Halimeda monile</i> (Ellis and Solander) Lamouroux	— — C
<i>Halimeda opuntia</i> (L.) Lamouroux	— C C
<i>Halimeda simulans</i> Howe	— — C
<i>Halimeda</i> sp.	— — C
<i>Penicillus capitatus</i> Lamarck	— — C
<i>Penicillus dumetosus</i> (Lamouroux) Blainville <i>F. expansus</i> Børgesen	— C —
<i>Penicillus pyriformis</i> A. Gepp and E. S. Gepp	— C C
<i>Rhipocephalus phoenix</i> (Ellis and Solander) Kützing	C — —
<i>Udotea conglutinata</i> (Ellis and Solander) Lamouroux	— C C
<i>Udotea cyathiformis</i> Decaisne	— C C
<i>Udotea flabellum</i> (Ellis and Solander) Lamouroux	— — C
Phylum Phaeophyta	
Order Sphaerariales	
Family Sphaerariaceae	
<i>Sphaeraria novae-hollandiae</i> Sender	C — —
Order Dictyotales	
Family Dictyotaceae	
<i>Dictyota bartayresii</i> Lamouroux	— — C
<i>Dictyota cervicornis</i> Kützing	— — C
<i>Dictyota dentata</i> Lamouroux	— — C
<i>Dictyota dichotoma</i> (Hudson) Lamouroux	— C C
<i>Dictyota divaricata</i> Lamouroux	— C C
<i>Lobophora variegata</i> (Lamouroux) Womersley	C — —
<i>Styposodium zonale</i> (Lamouroux) Pepenfuss	— — C
Order Punctariales	
Family Punctariaceae	
<i>Rosenvinnea intricata</i> (J. Agardh) Børgesen	— C —
Order Fucales

DISCUSSION

From the materials noted in the checklist, nine species of external parasitic isopods (Williams and Williams, 1980, 1981) have been described as new and three species of algae are being described as new species. Lymphocystis disease was reported for the first time on Caribbean fishes (Williams, Williams, and Grizzel, 1981) and the genus *Renocila* (Isopoda Cymothoidae) was reported for the first time from the New World (Williams and Williams, 1980). A large number of species in the checklist have not been noted previously to occur in the Dominican Republic, but are known to occur commonly throughout much of the Caribbean.

ACKNOWLEDGEMENTS

Thanks are expressed to Dr. Ismael Almodóvar, President of the University of Puerto Rico, for a grant which made the cruise possible; Ing. Ernesto Martínez Nadal, Head, and Clarence B. Bullock, Port Captain of Buildings and Grounds, Dr. Manuel L. Hernández-Avila, Director Department of Marine Sciences, and Dr. Luis R. Almodóvar, Assistant Director Department of Marine Sciences, for administrative and logistical support of the cruise; Dra. Idelisa Bonelly de Calventi, Director Centro de Investigaciones de Biología Marina, for establishing permissions and making arrangements for the cruise in the Dominican Republic; A. N. Carlos E. Espinosa Jiménez, Naval Base

27 de Febrero, for accompanying the cruise as military observer and for making arrangements for additional compressor gasoline at La Romana; Walter F. Hendrick for serving as safety and diving Officer; Luis H. Mendoza, Clarence B. Bullock, Lindorfo Cancel, Norton Cuesta, Antonio Rosado, Juan Rosado, José Salvador Ramos, José Vega, W. F. Hendrick, Miguel A. del Valle, Eduardo Mayo, and Manuel Montero for assistance with field work and research; Francisco X. Geraldes, Laura de Cambiaso, Miguel Ramírez and Adolfo Cambiaso, Centro de Investigaciones de Biología Marina for help in locating a lost anchor.
